Lecture SAT Example Breadth First Search

Prepared by S. Baskaran

State Space

The start state is "11111".

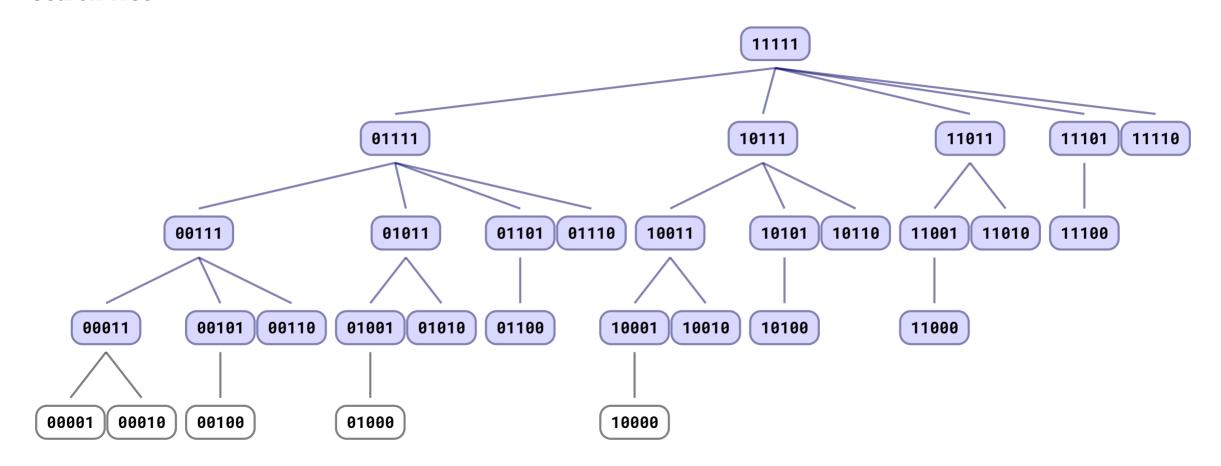

MoveGen is a one bit flip function.

It flips the bits from left to right, one bit at a time, and accordingly returns the neighbours.

 $\mathsf{F}(\mathsf{abcde}) = (\mathsf{b} \, \mathsf{V} \, \neg \mathsf{c}) \, \wedge \, (\mathsf{c} \, \mathsf{V} \, \neg \mathsf{d}) \, \wedge \, (\neg \mathsf{b}) \, \wedge \, (\neg \mathsf{a} \, \mathsf{V} \, \neg \mathsf{e}) \, \wedge \, (\mathsf{e} \, \mathsf{V} \, \neg \mathsf{c}) \, \wedge \, (\neg \mathsf{c} \, \mathsf{V} \, \neg \mathsf{d})$
